Galvanized Sheets

GALVANIZED SHEETS

Hot-dip galvanized sheet is produced on continuous zinc coating lines from either cold rolled (thickness range 0.30 mm to 2.0 mm) or hot rolled (thickness range 2.01 mm to 3.0 mm) steel substrate, in coil.

The galvanizing process yields homogeneously zinc-coated sheet with a bright, smooth metallic finish.

The zinc coating is supplied with a normal or flattened minimised spangle finish.

Spangle supplied for a wide range of applications where over-painting maintenance purposes may be undertaken at a later stage.

Weights per sheet

Dimensions mm	Unit Mass Per Sheet				
	0.5 mm	0.58 mm	0.8 mm	1.0 mm	1.2 mm
1 850 x 925	6.9	8.0	11.0	13.8	16.5
2 450 x 1 225	12.0	14.0	19.3	24.1	29.0

Dimensions mm	Unit Mass Per Sheet			
	1.6 mm	1.9 mm	2.4 mm	3.0 mm
2 450 x 1 225	38.6	45.9	57.9	72.4

GALVANIZED PRODUCTS are also available in coil,
cut to length, blanked or slit to specification.

WE CUT TO SIZE • High Definition Plasma Cutting
• Laser Cutting • Guillotine • CNC Bending
